

Belden IBDN Training

Overview

Ensuring Competency Worldwide

The Belden IBDN Training Center has been an integral part of the structured cabling industry landscape for over 14 years, having earned an international reputation for delivering the industry's most comprehensive and effective structured cabling training.

This reputation is forged on the experiences of more than 65,000 students trained worldwide since 1991. Today, the Belden IBDN Training Center serves the needs of more than 5,000 students each year. Our goal is to provide our students with the skills and knowledge necessary to ensure the highest quality and optimal performance in every Belden IBDN System that they design and install.

Ensuring competency and understanding of new technologies, techniques and industry standards is a key goal in our course development. Each Belden IBDN Training Course is regularly updated to include the most current information on Belden IBDN products and practices, as well as new developments in cabling industry standards.

Learn from the Experts

Belden IBDN instructors have combined experience of well over 100 years in the planning, design and installation of structured cabling systems. In addition to real life experiences, most are BICSI™ accredited RCDD and RCDD/LAN Specialists, and many have additional technical credentials from industry leaders such as Microsoft™ and Cisco Systems™. Many of them have taught Belden IBDN courses all around the world, and all have the industry knowledge and professional teaching style that maximizes the learning experience.

The Purpose of the Belden IBDN Training Center

To ensure solid and optimal network performance, a cabling system supplier should be evaluated on the following criteria:

- Credibility and Industry Standing
- System Offerings
- Customer Care
- Business Partners
- Warranty Program

Through the Belden IBDN Training Center, Belden ensures that our students and Business Partners consistently and accurately represent Belden IBDN Systems, products, and installation standards, with the goal of optimizing network performance.
